Note.—The population of this State and the Northern Territory, as shown in the above tables, was estimated by the method decided upon by the Statistical Conference of 1903, and confirmed by another Conference in 1906. Since the preparation of these estimates the Commonwealth Statistician has estimated the population of the States by a new method, his estimate for South Australia, including the Northern Territory, being—Males, 208,076; females, 184,588; total, 392,664. Allowing the estimate of the Northern Territory as per Table 2 (above) to stand, the population of South Australia proper as estimated by the Commonwealth Statistician would be—Males, 205,066; females, 184,001; total, 389,067; being 4,228 fewer males and 864 more females—3,364 persons fewer than the estimate shown in Table 1.

REPORT

TO THE

HON. ANDREW ALEXANDER KIRKPATRICK, M.L.C.,

CHIEF SECRETARY AND MINISTER OF INDUSTRY

OF THE

STATE OF SOUTH AUSTRALIA.

Statistical Office, Adelaide, January 7th, 1909.

Sir—I have the honor to submit for your information "Part III.—Production" of the Statistical Register, containing the statistics of Agriculture, Live Stock, Mining, and Manufactories for the year 1907, and to make the following report thereon, embodying the principal results ascertained relating to the condition of our chief producing and manufacturing interests during the period under review, together with such comparative statements as are requisite to exhibit their relative position and progress during the past decade.

In order to adequately represent the expansion of these industries and to modernise our statistical tabulations so as to supply the detailed information required by the Commonwealth Statistics Act, it became necessary to lay aside the collecting forms which had been in use for many years past and to prepare a new set for collecting by an entirely different system.

This entailed a large amount of foundation work and reorganisation, in consequence of which it was impossible to commence the collecting before the third week in March, 1908. This delay will not recur; in fact, I fully anticipate being able in future to complete the collecting and tabulating at least six weeks earlier than hitherto has been possible with far less detail to tabulate.

It is gratifying to report that, notwithstanding the extended scope of inquiry and the use of unfamiliar forms, the new method adopted resulted not only in the collection being performed as expeditiously and economically as in former years (when not one-tenth of the information was required), but in the attainment of a far greater degree of reliability.

As usual, the work was performed by the mounted constables, under the supervision of their inspectors. The work of compiling and tabulating the varied information obtained was commenced in this office as soon as the first return was received; and the summary of the wheat and hay harvest, showing the area, average yield, and rainfall, was published on June 27th, followed on August 17th by complete returns relating to the area and produce of each description of cereal, hay and green fodder crops, and the number of live stock in each county and district, with preliminary reports covering an amount of detail not possible of being shown in the returns.

The scope of inquiry will be better understood by a recapitulation of the subject-matters dealt with, the principal of which come under the following headings, viz.:—(1) Territorial Divisions; (2) Land Tenure and Settlement; (3) Rainfall; (4) Machinery and Hands Employed on Farms; (5) Cultivation (Cereal, Horticulture, Viticulture, &c.); (6) Grazing, Dairying, and Pastoral Pursuits; (7) Miscellaneous; and (8) Manufactories and Mining.

For statistical purposes the State is divided into conveniently sized districts, in such a manner as to enable the compiler to exhibit the result in each subject of inquiry for the whole State and in its several territorial divisions, whether county, hundred, electoral district, corporation, or district council.

Each collector is supplied with a plan showing the boundaries of the district to which he has been appointed.

In former years the detailed tables have been printed and bound with the Parliamentary Papers twice—once as appendices to the Report and again for inclusion in the Production Section of the Statistical Register. In order to avoid this duplication it has been arranged to print the details

details for the Statistical Register only and to attach this report thereto, an extra number of copies being printed for circulation as in the past.

Throughout this report, unless otherwise stated, the figures in parentheses are those pertaining to the previous season inserted for comparative purposes.

TERRITORIAL DIVISIONS.

South Australia, properly so called, extends over an area of 380,070 square miles, or 243,244,800 acres, and—including the Northern Territory, lying north of the 26th parallel of south latitude, covering 523,620 square miles, or 335,116,800 acres—the aggregate area is 903,690 square miles, or 578,361,600 acres.

The State is bounded on the south by the South Pacific, on the north by the Indian Ocean and Gulf of Carpentaria, on the east by the States of Victoria, New South Wales, and Queensland, and on the west by Western Australia. Situated between the 11th and 38th parallels of south latitude and 129th to 141st meridians of east longitude, its greatest length from south to north is 1,850 miles, and breadth from east to west 650 miles, having a seaboard of over 2,000 miles.

In my report on the Agricultural and Live Stock Statistics for 1890-91 the extent of country embraced within each of the five groups into which the State is subdivided for statistical purposes was indicated, and their several boundaries delineated. Also, in a general manner, the configuration of the country, the adaptability of the soil for farming or pastoral pursuits, the nature of the climate, the amount of rainfall, and the facilities for transport were described.

The introduction of this system in 1890 has enabled useful and reliable information to be compiled and published as regards the comparative productiveness of an area of country exceeding 80,000 square miles in extent Each division has its variety of soil, rainfall, and climate, and a season which may be favorable for one may be the reverse for another. Due recognition of this essential element in comparative results is afforded by the method on which the statistics are now collated.

I. The Central Division comprises all lands bounded on the north by a line of county boundaries from Port Wakefield to Morgan, and thence to the eastern boundary of the State; on the east by the River Murray, on the south by Encounter Bay, and on the west by the coast from Cape Jervis to Port Wakefield, together with Yorke Peninsula and Kangaroo Island. This division includes the counties of Adelaide, Gawler, Light, Albert, Alfred, Eyre, Sturt, Hindmarsh, Fergusson (Yorke Peninsula), and Carnarvon (Kangaroo Island).

The country in this division, the earliest settled and most populous, consists of mountainous ranges (Mount Lofty 2,334ft.), hills, and plains of superior agricultural land. The rivers Murray, Torrens, Onkaparinga, Gawler, Wakefield, and Light, and numerous minor watercourses attest the sufficiency of the water supply. The reservoirs in the neighborhood of the city have a storage capacity of 3,900,000,000 gallons. The climate is temperate, and the rainfall reliable, varying over a number of years from 42in. to 16in. on the hills and plains respectively, 21in. being the average fall at Adelaide.

It embraces 13,891 square miles, or 8,890,240 acres, of which 3,493,649 acres have been alienated (wholly or conditionally); 4,223,316 acres leased from the Crown—a total of 7,716,965 acres in occupation; 1,207,144 acres were in cultivation; 85,805 horses, 106,105 cattle (of which 51,771 are milch cows), and 1,376,041 sheep are depastured within its boundaries.

This division lies between the sea-coast and the River Murray, and is so intersected by rail (308 miles) and road that the facilities for transit are excellent. The bulk of the arable land is situated within fifteen miles of a railway station or a shipping port.

II. The Lower North Division is bounded on the south by the Central Division, on the west by the coastline from below Wallaroo to a little north of Port Pirie, extending easterly to the boundary, and includes the counties Burra, Stanley, Daly, Victoria, Kimberley, Young, and Hamley. This division enjoys also a temperate climate, but with an earlier season by some weeks. There is a fair rainfall, averaging from 13in. to 25in., according to the level of the country. Two mountain ranges traverse it from south to north, with broad well-watered plains of exceptionally good arable land intervening. Some of the tableland is 1,500ft. to 2,000ft. above sea level. The greater part is very valuable sheep country, and farmers and graziers have increased their flocks considerably.

The total area of this division is 12,401 square miles, or 7,936,640 acres, of which 2,585,521 acres are alienated, 4,637,916 acres are Crown leases, the total area occupied being 7,223,437 acres: 1,038,725 acres are cultivated, and the live stock maintained thereon are 47,642 horses, 42,670 cattle (of which 15,828 are milch cows), and 1,541,152 sheep. Ports Pirie and Wallaroo and 363 miles of railway throughout the district afford ample and cheap facilities for transport of produce. It possesses also the advantage of being the nearest agricultural land to the Broken Hill silver-mining district, with which it is connected by rail. The Wallaroo, Moonta, and Burra copper mines, and the Beetaloo and Bundaleer water reservoirs and systems, with a storage capacity of 856 million gallons, are situated in this division; also the Port Pirie and Wallaroo smelting works.

III. The

III. The Upper North Division includes all counties north of Port Pirie, and is bounded on the west by Spencer's Gulf as far as Port Augusta; thence northwards by the eastern shore of Lake Torrens, and includes the counties of Frome, Dalhousie, Herbert, Newcastle, Granville, Lytton, Blachford. Hanson, Derby, and Taunton. This division contains a large proportion of country popularly known as "beyond Goyder's line of rainfall," where the climate is hotter and drier, the average rainfall in the farming districts approximating 12in. to 15in. The storage reservoirs in this division have a capacity of 224 million gallons.

With the exception of counties Frome and Newcastle, through which the Flinders and Eastern ranges (Mount Brown 2,400ft.) run, the country chiefly consists of extensive plains with low rises and little surface water, and is subject to drought. Much of the country to the eastward is tableland considerably above sea level, namely, from 1,500ft. to 2,000ft., with a consequent lower temperature. The length of railways within this district is 369 miles, connecting with Port Augusta, Broken Hill, and the Transcontinental line to Port Darwin, open to Oodnadatta, 688 miles from Adelaide. The area within counties is 14,065 square miles, or 9,001,600 acres, of which 978,165 are alienated, 7,292,693 acres held under lease from the Crown, or 8,270,858 acres occupied, of which 561,811 acres are under cultivation. There are 21,560 horses, 46,419 cattle (of which 14,807 are milch cows), and 778,317 sheep within this division.

IV. The South-Eastern Division comprises all country east of the River Murray as far as the boundary, and on the south is bounded by the Southern Ocean. It includes counties Russell, Cardwell, Buckingham, MacDonnell, Robe, Grey, Buccleuch, and Chandos. The climate is, of course, colder and the rainfall heavier than in any other part of the State (except Mount Lofty Range), viz., 20in. to 30in. The land is low-lying, with isolated hills or ridges, and a large portion of the surface is covered with water, but some thousands of acres have been reclaimed or improved by drainage works. The district possesses several shipping ports, and is united to the metropolis by rail, of which 362 miles are in operation.

The area within these counties is 15,585 square miles, or 9,974,400 acres, of which 2,209,617 acres are alienated, 4,411,792 are leased from the Crown, altogether 6,621,409 acres in occupation, of which only 184,253 are cultivated, the country being almost entirely devoted to grazing; nine-tenths of the alienated land is stocked with cattle or sheep—53,673 of the former (including 14,704 milch cows) and 1,701,705 of the latter, besides 23,618 horses. Large areas are being newly cultivated in counties Chandos and Buccleuch. About 23,000 acres are laid down in permanent artificially sown grasses for sheep-feeding.

V. The Western Division is confined to lands within counties adjacent to the west coast of Spencer's Gulf and that portion of the southern coast lying between Port Lincoln and Fowler's Bay. It includes the counties of Flinders, Jervois, Musgrave, Robinson, Way, Dufferin, Kintore, Manchester, Hopetoun, York, and Buxton, comprising 24,511 square miles, or 15,687,040 acres. It has an equable climate and an average coastal rainfall (20in.). The land is principally used for sheep, of which 501,718 are kept. Horses number 13,709, and cattle 10,507; 361,093 acres are alienated, 7,370,330 acres leased from the Crown, total 7,731,423 acres; 316,452 are under cultivation—increased to the extent of 44,609 acres. There are several good harbors, and steamship communication is maintained.

The State.—The extent and singular configuration of the shore line—especially that of Spencer's and St. Vincent's gulfs—reaching over 1,300 miles in length, with numerous well-sheltered ports, harbors, and shipping places, favors the economical transport of produce.

The River Murray, the longest river in Australia (1,300 miles), into which the River Darling discharges itself at Wentworth, flows through South Australian territory for 320 miles to its mouth, and for that distance is usually navigable throughout the year.

Railways have been completed for 1,874 miles, and have been so designed as well to take the products of the several districts to the nearest port of shipment as to maintain the necessary intercommunication between all parts of the State.

The total estimated population on December 31st, 1907, was 389,067 persons (exclusive of the Northern Territory) as against 380,245 in 1906, an increase of 8,822 persons.

No portion of the fifty-one millions of acres (of which thirty-six millions are occupied) embraced within the proclaimed counties, except in the Western District, is more than twenty-five miles from seaboard, railway, or river carriage.

TENURE AND LAND SETTLEMENT.

South Australia proper has an area of 243,244,800 acres, of which 9,629,540 acres are alienated either wholly or conditionally and 98,656,913 acres leased; 70,586,052 acres of the leased country is situated outside the counties and 28,070,861 within the counties. Beyond the limits of agricultural settlement 124,044 square miles (or 79,388,160 acres) are held by 511 Crown lessees as sheep or cattle runs. The rental accruing was £24,245, as against £23,786 the year before.

The

The following brief summary shows the conditions under which the land was settled on December 31st, 1907 :—

CLOSER SETTLEMENT.

The following statement shows particulars of the disposal of the 326,630 acres of land purchased for £842,068 under the Crown Lands Act, 502 of 1890, &c., for closer settlement up to December 31st, 1907 :—

—	Number.	Area.	Amount.
		Acres.	£

Remaining unoccupied	—	5,162	—

It will be observed that of the total area purchased only 5,162 acres are unoccupied, the greater portion of which is under survey prior to allotment, and the balance consists of roads.

LAND SOLD FOR CASH.

The total area of land sold for cash during the year was 128,239 acres (73,499), and the total amount realised £72,856 (£53,707), an increase of 54,740 acres and £19,149.

The land sales for cash, including credit sales on which purchase has been completed, from the foundation of the State aggregated 8,194,032 acres for £10,101,121 at the end of the year 1907.

AREA AND DISTRIBUTION OF HOLDINGS WITHIN COUNTIES FROM WHICH RETURNS WERE COLLECTED FOR THE YEAR 1907.

Of the 32,161,693 acres in use, either for cultivation or grazing, within counties, 7,503,561 acres were privately owned and 24,658,132 acres leased or held under agreements to purchase from the Crown. Of the privately owned land 6,595,252 acres were occupied by the owners, and 908,309 acres by private tenants.

Of this area 2,265,017 acres were under crops or cereals, fruits, and market garden produce. The following statement sets forth the distribution of the holdings :—

AREA SUITABLE FOR WHEAT-GROWING.

Every occupier supplied information as to the total area of his holding suitable for wheat-growing. The total aggregate area—8,338,403 acres—thus arrived at is divided as follows .—Central Division, 2,612,366 acres; Lower North Division, 1,969,963 acres; Upper North Division, 1,123,552 acres; South-Eastern Divsion, 840,370 acres; Western Division, 1,792,152 acres. It must be remembered that these areas refer only to land actually in occupation at the time of collection.

RAINFALL.

The following table, supplied by the Divisional Officer of the Meteorological Bureau, shows the rainfall (approximate mean) in each month during the last ten years. It fairly represents the average rainfall over the whole of what may be termed the agricultural or wheat-growing districts of South Australia. In forming the table, Mount Lofty, where the rainfall is exceptionally heavy, and Port Augusta, where it is exceptionally light, have been excluded.

The following table shows the rainfall at certain selected stations throughout the farming districts during the wheat-growing season, from April to September, in the years 1905, 1906, and 1907, and the average fall over a series of years for the same months. These particulars, especially prepared by the Divisional Officer of the Meteorological Bureau, are so instructive that this statement should be preserved for future reference :—

MACHINERY AND HANDS EMPLOYED ON HOLDINGS.

MACHINERY AND IMPLEMENTS.

Each producer was called upon to estimate the value of all his plant and machinery, due allowance being made for depreciation. As a result it has been possible to arrive at a fairly accurate estimate of the value of capital invested in this way. The total estimated value is £1,782,215, divided as follows :—

Used mainly in general agriculture	£1,492,389	£1,782,215
" orchards, &c.	95,117	
" dairying	67,557	
" pastoral pursuits	118,242	
Travelling machinery, such as threshing-machines and chaffcutters	8,910	

HANDS EMPLOYED.

The department had frequently been asked for particulars of the labor employed in our primary industries, and in order to obtain reliable information the collectors were instructed to make careful inquiry as to the persons employed. The proprietor, manager, and all regular hands were included, and as many of the family as assisted, but temporary hands engaged shearing, &c., domestic servants and cooks, were not included. In the case of mixed farming, where a person is engaged in several branches of farm work, he has been counted under the principal one engaging his time. The returns show that 49,910 persons (37,036 males and 12,874 females) were deriving constant employment on the land—cultivating, 33,737; dairying, 9,877; and pastoral, 6,296.

The following table shows how the labor is distributed according to the several divisions of the State :—

CULTIVATION

CULTIVATION.

The area under crop in the Commonwealth in 1907-8 aggregated 9,320,890 acres, showing an average of 2·23 (2·32) acres per head of the population. In proportion to population South Australia has the largest area under crops, 2,265,017 (2,157,235) acres, forming nearly one-fourth of the whole—being 5·77 (5·62) acres per head. New South Wales, 1·63 (1·85) per head; Victoria, 2·59 (2·68) per head; Queensland, 1·02 (1·05) per head; Western Australia, 1·90 (1·76) per head; and Tasmania, 1·40 (1·36) per head.

South Australia—erstwhile the granary of Australia—has practically been built up by the production of cereals; for a number of years, however, the farmers have also engaged largely in other branches of husbandry, devoting more attention to grazing, sheep-breeding, dairying, and kindred occupations, rendering themselves less and less dependent on wheat production. For example, up to the time of the drought many more cattle and sheep were kept on farms in the Lower and Upper North than there had been before the lands were thrown open to agricultural settlement, districts which ordinarily supply two-thirds of the whole wheat crop. In 1907-8 the area cultivated (including 1,008,733 (1,065,921) acres of fallow land) within the counties was 3,308,385 (3,246,835) acres, and the sheep kept 5,898,703 (5,715,413), the total number of sheep in the State being 6,829,637 (6,624,941), a total increase of 204,696.

The following is a comparative statement of the area under cultivation, including land in fallow, and the number of sheep depasturing in each division in 1905-6 and 1906-7, together with the increase or decrease:—

Farmers who were also sheep-breeders and graziers had profitable returns from the produce of their sheep, and it will be noted that in every division but one flocks have increased. The exports of wool for 1907 totalled 50,639,368lbs. (41,771,682lbs.), valued at £2,100,067 (£1,561,664).

AGRICULTURE.

Utilising sheep in the stubbles and on the fallows, thereby clearing the land of wild oats and noxious weeds, is very general, as also is early sowing with the aid of the drill, depositing such chemical manures as are required by the soil to produce good and clean crops of superior grain. Ground so husbanded has yielded more than double the return in frequent instances, both of wheat and hay, and conduces to the fuller development of the staple products of the country, and consequently to the additional value of real estate.

The

The season 1907-8 gave rise to many speculations as to the results. Beginning with early rains in April, the farmers were enabled in many districts to make a good start in tilling, and as favorable weather conditions prevailed until August it was confidently predicted that South Australia had great prospects of garnering a record harvest. During that month very heavy frosts occurred in many districts in the State, which, as events proved, did more good than harm to the wheat plant, as they prevented vigorous growth, and, in view of the subsequent dry periods in September and October, thereby aided considerably in the salvation of the crops. These two months are considered the most critical in wheat-growing in this State. Last September and the greater part of October were very dry, and hopes of even a fair crop were then fast diminishing.

The following rainfall table shows the approximate mean fall in each month, from April to November, over the whole of the agricultural districts for the last two seasons, and the mean for 47 years for the same area and months:—

	April.	May.	June.	July.	August.	September.	Total Six Months.	October.	November.
1906 ...... Inches	·70	1·77	4·32	3·71	3·00	3·20	16·70	1·67	2·48
1907 ...... "	2·98	1·76	2·38	3·00	2·93	1·18	13·92	1·45	1·82
Mean for 47 years .. Inches	1·80	2·57	3·04	2·84	2·57	2·06	14·88	1·79	1·06

The total fall for the six months was 2·78 less than the previous season and ·96 less than the mean of 47 years, and the fall in September was 2·02 less than the previous year and ·88 less than the mean of 47 years.

However, the rain came just when wanted. The light fall at the close of October, followed by the bountiful fall in November, which extended all over the agricultural areas, changed the harvest prospects beyond all anticipation.

FERTILISERS.

Not many years ago the use of artificial manures was, except to a few, unknown on farms. This year particulars were collected as to the acreage so treated and the manures used. The returns show that last season 1,555,153 acres were treated with 60,000 tons of superphosphates, bonedust, &c., and 18,700 acres with 124,092 loads of stable yard and other natural manures. The Inspector of Fertilisers estimates that for each of the previous ten years the following quantities of artificial manures have been used for cereal crops:—1897, 3,000 tons; 1898, 12,500 tons; 1899, 16,500 tons; 1900, 24,600 tons; 1901, 31,400 tons; 1902, 37,500 tons; 1903, 44,500 tons; 1904, 52,000 tons; 1905, 56,500 tons; 1906, 59,000 tons.

AREA UNDER WHEAT.

2,024,822 acres were under wheat, 271,067 of which were cut for hay, against 1,984,770 and 298,396 cut for hay in the previous season.

The Western Division shows a substantial increase, counties Flinders and Jervois being the chief contributors.

In the South-Eastern Division county Chandos records an increase of 18,489 acres on area sown with wheat.

At the Observatory the total rainfall for 1907 was 17·782 inches, as compared with 20·495 inches (the average for 47 years), being 4·35 inches above the driest year (1876) and 13·09 inches below the wettest year (1889).

The rainfall in each division was as follows, the figures in parentheses being those of the previous season:—Central, 15·67 (21·17); Lower North, 13·70 (15·87); Upper North, 11·66 (14·07); South-East, 18·34 (23·66); and Western, 11·74 (13·98) inches.

Nearly two-thirds of the whole area cultivated (3,308,385 acres) was sown with wheat, or over five acres for each individual of the population. The acreage under wheat for grain was 1,753,755 acres.

The marvellous effect of the October and November rains was attested by the aggregate quantity of wheat reaped—19,135,557 (17,466,501) bushels. A careful investigation has resulted in my estimating the official wheat aggregate of 17,466,501 bushels for the season 1906-7 to be several million bushels below the actual yield, and I am of opinion that this was due not so much to the districts being incompletely canvassed by the collectors as to the farmers either deliberately or negligently understating the yield. The figures were based on the farmers' own statements, and it is regrettable that they must stand as the official record, as it is impossible to satisfactorily revise them according to districts. In comparison the returns for 1807-8, though not quite so good as the *actual* results for 1906-7, on paper appear much better.

The following figures show for each division the average yield per acre on the area sown for grain, viz.:—Central, 11·67 (10·38) bushels; Lower North, 13·76 (12·30); Upper North, 8·90 (10·13); South-Eastern, 8·20 (9·14); Western, 6·75 (6·31); and for the State, 10·91 (10·36) bushels respectively, the figures in parentheses being those for the previous season.

For

For the first time an effort was made to ascertain the amount of the previous season's wheat carried forward on December 31st, 1907. The returns collected from millers and farmers gave a total of 2,400,000 bushels of wheat, either in the grain or as flour. As no account was taken of the quantity held in stock by bakers and stores, the aggregate given is well below the mark. Including the carried forward the exportable surplus for 1908 was estimated to be not less than 17,800,000 bushels.

* Mean + Total 46 years.

The foregoing statement shows that during the forty-seven years (1861-1907) the total number of acres of wheat sown was 62,165,382 acres, off which 415,232,102 bushels were reaped, giving an average yield of 6·68 bushels per acre on area sown. The average for the last six years is 8·41. The average annual rainfall (Adelaide) was 20·44 inches. The quantity of breadstuffs shipped during the same period was 7,193,120 tons, of the total value of £60,511,387, and the average price of wheat at Port Adelaide 4s. 6d. per bushel.

Further information will be found in an appendix to this report, giving for forty-six years the area sown, the produce, and the average yield per acre, also the rainfall over the agricultural areas in each division of the State.

GOYDER'S LINE OF RAINFALL.

So important is the question often discussed whether wheat-growing is to be continued in the country known as beyond Goyder's line of rainfall, that a special table (No. 28) has been prepared covering the last six seasons (1902-3 to 1907-8). The area of the State within counties is 80,453 square miles, of which approximately 46,780 square miles are within and 33,673 square miles are beyond the line of rainfall.

The area within the line of rainfall embraces approximately the Central Division, less portions of counties Albert and Eyre, and county Alfred; the Lower North Division, less counties Hamley, Kimberley, Young, and portions of counties Burra, Daly, and Victoria; the Upper North Division, portions only of counties Dalhousie and Frome; the whole of the South-Eastern and Western Divisions, with the exception of portion of county Jervois in the latter division.

The table referred to shows one-third of the total area sown for wheat in the State to be situated beyond the line of rainfall, which also yielded about one-fifth of the total produce. Particulars as to area sown, reaped, and not reaped, total and average yield of wheat and hay, together with the approximate mean rainfall, are shown.

The mean average yield for the six seasons within the line was on area sown and reaped 9·81 and 10·21 bushels respectively, and beyond the line on area sown and reaped 5·72 and 6·281 respectively.

HAY.

In former years particulars were only gathered as regards wheaten hay. This year the total of hay of all kinds is given at 376,170 tons from 328,672 acres, averaging 1·14 tons per acre. Wheaten hay (the only line for which we have previous records) yielded 315.857 tons (398,866) from 271,067 acres, averaging 1·17 tons per acre against 1·34 tons; oaten, 50,753 tons from 48,151 acres, averaging 1·05 tons per acre; barley, 1,547 tons from 1,588 acres; lucerne, 4,324 tons from 3,767 acres; and unstated, 3,446 tons from 3,912 acres.

Wheaten hay is chiefly grown in the following counties, the figures in parentheses being those of the previous season:—Adelaide, 32,148 (43,518) acres; Gawler, 28,559 (20,510) acres; Light, 30,435 (24,843) acres; Victoria, 30,998 (29,327) acres; Daly, 21,500 (27,358) acres; and Stanley, 16,879 (19,258) acres. The returns show that the farmers had 104,000 tons of old hay in stock on December 31st, 1907. The export trade in hay and chaff has been an important item during the last five years, as indicated by the following table:—

Year.	Quantity.	Value.

1903	70,768	287,522
1904	25,861	78,622

BARLEY

BARLEY AND OATS.

The acreage under barley and oats is the highest on record in the State. The Central, South-Eastern, and Western Divisions contributed chiefly to the substantial increase. It will be noted that malting barley has this year been distinguished from other kinds of barley grown, the production of malting barley being 383,057bush. out of a total of 566,937bush., the increase on barley of all kinds being 75,691bush. The averages per acre were—malting barley, 16·51; other barley, 13·02; total, 15·19.

The area under oats for grain was 66,297 (57,000), an increase of 9,297 acres. The average yield was 13·19bush. (15·72bush.) per acre, the total reaped being 874,388bush. (896,166bush.).

GREEN FODDER.

The total area either cut for fodder or fed off is given at 15,434 acres, the chief being lucerne, with 9,411 acres; 13,565 tons were cut for green fodder, the value of which, including the value of the area fed off, being estimated by the growers at £23,866. In addition a large area was sown with natural grasses of a permanent character, the acreage so planted having increased from 23,679 to 34,635 acres.

STRAW.

The quantity of straw saved from the various cereal crops has not hitherto been recorded. This year's returns show that 24,944 tons of all kinds of straw were gathered, representing an estimated value of £49,888. The chief items were wheaten, 14,519 tons; oaten, 6,735 tons; and barley, 3,538 tons.

FIELD PEAS.

These are mostly cultivated in the hilly country in counties Adelaide and Hindmarsh, where pig-rearing and bacon-curing are chiefly carried on. The crop as a rule gives a better return than wheat, and is well known for its recuperative action on exhausted soils. The area under cultivation was 7,514 (7,149) acres, an increase of 365 acres, the total yield—117,994bush.—averaging 15·70bush. (19·63bush.) per acre.

FALLOW.

The area returned as in fallow was 1,008,733 acres, compared with 1,065,921 acres, a decrease of 57,188 acres. The decrease in area occurred in the two Northern Divisions, and is largely attributable to the dryness of the weather at the time usually devoted to this important part of cultivation.

The following table shows at a glance the percentage fallowed land bears to the total area cropped with cereals for grain, hay, and fodder for the last five years:—

HORTICULTURE, VITICULTURE, AND MARKET GARDENS.

HORTICULTURE.

Orchards. —Total area, 20,736 (18,199) acres divided as follows:—14,772 acres reached bearing age and 5,964 not reached bearing age. Bush and berry fruits, it is estimated, covered 874 acres of the total shown.

Our fruit industry has made very rapid progress during the past few years, and hence information respecting many new lines has been collected for the first time. In the following tabulation the total fruit production is shown, and approximately the number of trees:—

Trees.	Number.	Production.
Almonds	218,417 (199,413)	6,568 (7,010) cwts.
Apricots	224,870	148,726 bushels
Apples	800,154 (755,930)	467,293 (311,538) bushels
Cherries	80,627	53,984 bushels

With the exception of currants and raisins, information of the production for previous years is not available.

The total estimated value of the production of our vineyards and orchards being £263,534.

VITICULTURE.

Vine-growing is one of our most important industries, and has made considerable progress during the past decade. For the season under review the growers were asked to show the areas cultivated under three headings:—For wine-making, for table use, and for drying, and also to furnish the total production, and not simply the quantity of grapes sold as in previous years. Great difficulty has always been experienced in obtaining reliable information regarding vineyards, orchards, and gardens, and as a result comparisons are unsatisfactory. The areas cultivated in comparison with previous years show an increase for orchards and decreases for vines and gardens. This is due largely to the old forms not being sufficiently specific and the occupiers entering the areas under the wrong headings, duplication thus occurring in tabulating. With the adoption of an entirely new set of forms, under statutory authority, the information now collected and tabulated may be accepted as fairly representing the true position of the industries.

Area bearing, 19,415 acres; not reached bearing age, 1,665 acres; total area, 21,080 acres. The total area is divided as follows:—For wine-making, 13,747 acres; table use, 1,819 acres; and for drying, 3,849 acres.

The total grape production amounted to 26,005 tons, or an average of 1·34 tons per acre. Of this total it is estimated that 15,261 tons were used in making 2,061,987galls. of wine, 7,939 tons for drying purposes, and 2,805 tons for table consumption and export; 24,488cwts. (16,123 cwts.) of raisins, an increase of 8,365cwts.; and 19,958cwts. (14,361cwts.) of currants, an increase of 5,597cwts., were produced. With reference to currants it is desirable to explain that the previous year's figures of production have been revised, it having been ascertained that certain growers had for several years filled in their returns as hundredweights when pounds were intended.

The following statement shows for a period of ten years the quantity of wine made, in stock, and exported; also the quantity of locally distilled spirits produced:—

1908	2,061,987	4.641,622	—	—	—	—

In 1898 the locally grown wine reported in stock was 3,717,951galls.; it is now returned as 4,641,622galls. The wine export for the year 1907 reached 737,664galls., an increase of 174,845galls., or 31 per cent. The recorded export value was £120,393, which gave an average of 3s. 3d. per gallon; in the previous year the shipment was valued at £99,247, or 3s. 6d. per gallon. I estimate the average annual consumption of wine as a beverage in this State to be 1·85galls. per head.

MARKET GARDENS.

This is the first occasion that particulars have been definitely obtained in reference to market gardens. While the previous heading, "Gardens," was supposed to include only market gardens, it is certain that many holders treated their orchards as gardens, and entered the area under this heading as well; hence the area of gardens shown in previous reports cannot properly be compared. The total area returned was 2,961 acres, and the estimated value of the produce was given by the growers as £86,181. Vegetables (excluding potatoes and onions) exported during the year 1907 reached a value of £25,385, an increase of £3,747 on the year 1906.

Root Crops.—10,235 acres were under crop—9,085 (9,894) acres with potatoes, yielding 20,373 (22,277) tons, averaging 2·24 tons per acre; 366 acres with onions, yielding 2,228 tons, averaging 6·09 tons per acre; and 637 acres with other kinds of root crops. These crops are grown in the Central and South-Eastern Divisions of the State.

LIVE STOCK.

This section has received very special attention, and a large amount of new information has been collected.

DAIRYING.

The following decennial table, showing the number of milch cows in the State and the quantities of butter and cheese made and exported, speaks eloquently of the expansion of the dairying industry during that period:—

It will be noticed that during the past three years the quantity of butter made has been well over 8,000,000lbs. annually. The value of the butter exported during 1907 was given at £112,739 (£103,171), or an increase of £9,568.

Butter, Bacon, and Cheese Factories.—There are 10 bacon and 57 butter and cheese factories in the State, the latter being described as 34 butter, 8 butter and cheese, and 15 cheese factories. These employ 263 hands—248 males and 15 females. They possess machinery estimated to be worth £28,718, the power of the engines (full capacity) being 458 h.p. In these factories 11,323,912galls. of milk were used in making 4,631,773lbs. of butter and 1,416,281galls. for making 1,381,947lbs. of cheese. In addition bacon and hams were cured to the extent of 1,225,623lbs.

Butter, Bacon, and Cheese Making on Farms.—It is not generally known that nearly all the separating is done on farms. As a matter of fact only 776,801galls. of milk out of a total of 11,323,912galls. used in factories were treated in butter factories, the balance (10,547,111galls.) having been separated on farms and the cream sent to factories; 9,877 hands (1,734 males and 8,143 females) are reported to be engaged on farms in connection with dairying. Of course it is recognised that the greater number of these hands are also engaged in many other duties as well. The value of plant and machinery used on farms is estimated to be worth £61,809; 6,057 separators are in use; 10,828,446galls. of milk were used in making 3,887,567lbs. of butter, and 4,437galls. in making 3,843lbs. of cheese. In addition bacon and hams were cured to the extent of 1,085,381lbs.

Summary of Factories and Farms.—Total number of dairy cows, 100,743; hands employed, 10,140 (1,982 males and 8,158 females); value of plant and machinery used, £90,527; 22,152,358galls. of milk used in making 8,519,340lbs. of butter, and 1,420,718galls. for making 1,385,790lbs. of cheese. In addition bacon and hams were cured to the extent of 2,311,004lbs.

HORSES.

In former years the collection was made under the headings "Working" and "Other." These have given place to the headings "Light" and "Draught" with a column for entires over two years old.

There are 86,464 light and 120,135 draught horses in the State.

Entires over two years old included in the foregoing totals number 2,040.

During the year 3,986 (3,656) horses crossed the border inwards and 1,699 (2,285) outwards.

The following table shows the increase in numbers and percentage for the State and for each division:—

CATTLE.

Compared with the previous year there are 334,671 head of cattle, as against 325,724, an increase of 8,947. In the counties there are 259,374, compared with 257,248 a year ago, or an increase of 2,126 head.

Dairying cows show an increase of 2,900; 35,150 of the total (100,743) were reported as being dry at the time of the collection.

During the year 19,617 cattle crossed the border inwards and 7,179 outwards.

The subjoined return gives the number of cattle depasturing within each division in 1906 and 1907, together with the increase or decrease :—

SHEEP.

Notwithstanding the heavy slaughtering for consumption and export, and the mortality through disease, dogs, and natural causes, the increase to the flocks has been most satisfactory.

Our flocks now number 6,829,637 (6,624,941), an increase of 204,696, or 3·09 per cent. on the previous year.

During 1907 382,786 sheep crossed the border inwards and 87,120 outwards; 5,898,703 sheep, or 86·37 per cent., are depastured within the boundaries of counties and the remainder in the outside pastoral districts.

The subjoined table gives the number of sheep depasturing within each division in 1906 and 1907, together with the increase or decrease :—

At the commencement of the decade (1898) the Adelaide rainfall was 20·75 inches, the number of sheep 5,012,620, export of wool 35,118,644lbs. (or 7·01lbs. per fleece), and the London price 8d. per pound. In 1907 the rainfall was 17·78 inches, the number of sheep 6,829,637, the shipment of wool 50,639,368lbs. (or 7·41lbs. per fleece), and the London price 9½d. per pound, average greasy. In the preceding season 41,771,682lbs. were exported (or 6·31lbs. per sheep), and the London price was 9d. per pound.

PIGS.

A decrease of 20,499 is reported, the total being 90,741, against 111,240 of the previous year. When other branches of the farming industry are favored with good seasons and prices less attention is evidently given to the rearing of pigs.

All the States have been favored with good seasons, and it is noteworthy that they, in common with South Australia, report substantial decreases in the number of pigs.

GOATS.

Of the total (13,428) the Angora goats numbered 3,650, and there is a probability of their being largely increased, as they thrive splendidly in the interior of the State and the northern counties.

OTHER STOCK.

In the total of 5,392 are included—camels, 2,592; mules, 625; donkeys, 1,031; ostriches, 1,063; and 81 not stated.

LIVE STOCK SLAUGHTERED.

The following table summarises the stock slaughtered for consumption in the various divisions of the State. The information is not available for previous years:—

In addition to the above 4,482 sheep and 269,856 lambs were slaughtered for export.

It will be seen, therefore, that the flocks and herds supplied for local consumption and export during the year were—Sheep and lambs, 1,020,220; cattle, 58,050; pigs, 54,552.

MORTALITY OF STOCK.

The following are the losses of stock from various causes:—Cattle, 10,424 (3,067 being attributed to dry bible); sheep and lambs, 167,441 (dogs and foxes, 47,480; drought, 20,822; natural causes, 54,582; other causes, 44,557); horses, 6,240; goats, 146; pigs, 459; and camels, 19.

VALUE OF PASTORAL EXPORTS.

The net value of exports of pastoral products—animals (living), skins and hides, tallow, horns, and wool—for the year 1907 amounted to £2,566,448, against £2,050,145 in 1906, an increase of £516,303. The chief item was wool, the following being the figures for the two years:—1906, greasy and scoured, 124,674 bales = 41,771,682lbs., valued at £1,561,564; 1907, greasy and scoured, 156,231 bales = 50,639,368lbs., valued at £2,100,067.

MISCELLANEOUS.

BEE-FARMING.

The keeping of bees is generally carried on in conjunction with other pursuits. With a suitable climate and natural flora it is surprising that the industry does not increase with greater rapidity. Information respecting this pursuit was first obtained in 1891, when it was found that 500 tons were gathered. The year 1900 was very favorable, the returns for that year showing 26,700 hives and a production of 763 tons of honey. The production for the last five years has been as follows:—315,765lbs; 1,197,737lbs.; 1,193,421lbs.; 1,090,489lbs.; 953,395lbs.

The returns for the year 1907 show 18,529 productive hives and 5,101 unproductive—a total of 23,630, in comparison with 24,107 of the previous year; 953,395lb. of honey and 12,854lbs. of beeswax were gathered.

POULTRY.

Many difficulties are in the way of obtaining thoroughly reliable details of this industry. This year the collectors were requested not only to collect from the holdings they visited, but to supply an estimate respecting the towns in their districts. It is estimated that the poultry and egg production of the State for the year was worth £414,696. Eggs to the value of £122,191 were exported. The returns show that there are 1,219,453 fowls, 55,079 ducks, 17,694 geese, and 36,000 turkeys in the State.

ENSILAGE.

There are 70 pit and 17 stack silos on 56 farms, with a total capacity of 153,948 cub. ft., and the quantity of ensilage made was 2,088 tons.

OLIVE OIL.

Olive cultivation has been carried on for many years, the climatic conditions, the nature of the soil, and the introduction of the best varieties all tending to the success of a remunerative industry in the production of fruit and oil of the best quality. The quantity of oil expressed was 16,954galls., compared with 16,164galls. for the previous year.

WATTLE BARK.

South Australian wattle bark holds a high place in the market for tanning purposes. The quantity of bark stripped was 7,787 tons, compared with 7,274 tons of the previous year. The exports during each of the last five years are as follows:—6,669 tons, 7,204 tons, 7,040 tons, 7,138 tons, 6,242 tons; value £65,062, £59,902, £54,475, £59,996, and £57,248.

MANUFACTORIES AND WORKS.

The industrial statistics of the State, as will appear by reference to tables 53 to 57, are now far more comprehensive than in former years. This has been made possible by the bringing into operation of the Commonwealth Statistics Act, under which it is compulsory for proprietors of all factories and works to furnish annual returns of their business to the statistician. This they need have no hesitation in doing, because the strictest secrecy is observed respecting individual returns, and every endeavor is made to so tabulate the results as to avoid the disclosure of the business of any one factory.

Owing

Owing to records not having been kept respecting many of the new items it was necessary to accept approximations from some factories. To this extent, therefore, the aggregate results of the tabulations may be wanting in absolute reliability. However, notwithstanding this disability—which always occurs more or less in the first year's collection of new material—the information presented in the returns, and briefly referred to herein, may be accepted as fairly representing the actual results of the industries of the State for the year 1907. The collection and tabulation have been accomplished with greater thoroughness than has hitherto been possible. No return was tabulated until all detected errors had been adjusted by the informant or the tabulator.

In view of the great importance attached to these statistics locally and by other countries proprietors should make a speciality of furnishing absolutely accurate returns, and by so doing will save their own time and the time of the officers of this department in correcting errors. It is pleasing to report that the proprietors of many factories and works have already taken steps to keep such records as will enable them in future to readily supply the information sought.

For statistical purposes every establishment (factory, workshop, or mill) employing four hands or upwards in manufacturing or repairing articles, whether for the trade (wholesale or retail) or for export, also every similar establishment (even if employing less than four hands) where machinery worked by power is used, is compelled to furnish a return on similar lines in every State of the Commonwealth.

NUMBER OF FACTORIES AND HANDS EMPLOYED.

Factories, 1,086 (1,018); increase, 68. Hands employed, 22,635 (20,306); increase, 2,329—males, 18,408 (16,467); females, 4,227 (3,839).

The percentage of the sexes employed to the total are—males, 81·32 (81·10); females, 18·68 (18·90)—an increase in males of ·22 per cent. and a decrease in females of ·22 per cent.

The number of these hands under 16 years of age was 1,607 (1,566)—males, 1,127 (1,166); females, 480 (400).

The hands employed are divided as follows:—

	Males.	Females.	Total.
Working proprietors	960	61	1,021
Managers and overseers	621	45	666
Accountants and clerks	711	84	795
Enginedrivers and firemen	499	—	499
Workers (skilled and unskilled)	14,693	4,033	18,726
Carters and messengers	561	1	562
Others	363	3	366
Total	18,408	4,227	22,635

In addition 66 hands—15 males, 51 females—were returned as being employed at their own homes for various establishments.

The greatest number employed at any one time during the year aggregated 25,813—males, 20,983; females, 4,830.

HORSEPOWER EMPLOYED.

728 establishments used machinery worked by power other than manual, the total horsepower provided being—full capacity, 21,029 (17,815); actually used, 15,752.

Kinds of Power.	Number of Engines.	Horsepower.	
		Full Capacity.	Actually Used.
Steam	517	14,807	11,121
Gas	191	2,721	1,917
Electric	279	1,728	1,240
Oil	146	1,585	1,287
Other	4	188	187

SALARIES AND WAGES PAID.

Excluding the amounts drawn from the business by working proprietors, the total amount was £1,734,394, averaging £80 5s.

FUEL, LIGHT (INCLUDING COST OF MOTIVE POWER, SUCH AS GAS AND ELECTRICITY).

The value of this item is set down at £281,532.

VALUE OF RAW MATERIAL USED, TREATED, OR WORKED UP.

£5,893,355 is the estimated value of this item.

OUTPUT.

The total wholesale value on the premises of new work turned out and the charges to customers for repairing work is given as £9,351,971.

PLANT, MACHINERY, &c.

The approximate value of all plant and machinery used in the production is £1,475,971, and that of the land and buildings used for factory purposes £2,565,289.

The total outlay for wages, fuel, and material was £7,909,281, and the value of the work produced was £9,351,971, leaving a difference of £1,442,690, or 15·43 per cent., as the margin of profit, from which, of course, must be deducted all miscellaneous expenses (such as rents, interest on vested capital and stocks, depreciation, &c., of machinery and plant, insurances, and incidental distributing expenses), concerning which no information was collected. As this is the first year the information has been obtained, and hence no comparison as regards our own State is possible, it is valuable to note that the margin on the same basis and for the same period in Victoria is given as 17·4 per cent.

It is interesting to notice the proportion the outlay on the three lines recorded (wages, fuel, and material) bears to the total value of the output. They are as follows:—Wages, 18·54 (19·7) per cent.; fuel, &c., 3·01 (1·6) per cent.; materials, 63·02 (61·3) per cent.—total, 84·57 (82·6) per cent., leaving 15·43 (17·4) per cent. for all other charges and the margin of profit. The figures in parentheses are for the State of Victoria for the same period, and are quoted for comparative purposes in the absence of any previous records for this State.

AUDITORS' REPORT.

We have audited the accounts of the Savings Bank of South Australia for the year ended June 30th, 1907, and hereby certify that in our opinion the above Balance-sheet, Profit and Loss Account, and Statement of Reserve Funds are correct. We have also verified the cash balances and examined the Government bonds, mortgage deeds, and all other securities held by the bank, finding them to agree with the balance-sheet. We have also compared with the ledger accounts 28,748 depositors' pass-books, showing balances amounting to £1,721,726 10s. 2d., and hereby certify them correct.

* The inmates comprised in this return may be classed as follows, namely—Aged, sick, and infirm. No able-bodied person is at any time admitted into the Destitute Asylum.

† All the male adults (except aged and infirm) specified in this return were relieved in consequence of sickness on a medical certificate. Many of the females received out-door relief from similar causes. The remainder with the whole of the children enumerated in the table were relieved in consequence either of the death of the husband, or the desertion of the family by the husband, or the absence of husband in search of employment, or during husband's incarceration.

‡ Impossible to state number of Australia out-door.

Note.—The numbers under the different nationalities in the out-door are only approximate.

a No production statistics collected. Any figures shown for these years are estimated. *b* From 1869 to 1883 the figures include credit sales, many of which were not completed, the aggregate alienation for cash to 1883 being 6,494,067 acres—£8,391,724.
c These totals represent actual sales, including credit sales on which purchase has been completed, and exclude 122,027 acres granted for public purposes without purchase, and 1,134,424 acres in process of alienation under system of deferred payments.
